

## WHY WATERBLASTING?

Highway Markings, Inc. is proud to use the Stripe Hog waterblasting removal system. As you can see the old method of grinding damages the surface and actually polishes the aggregate making it still appear like a line. Waterblasting eliminates this problem and many more. The vacuum recovery system removes 99% of the waste from the road immediately, leaving it clean and nearly dry. Waterblasting is the best method for your stripe removal needs. Let us put our service to work for you.

needs!

The waterblasting difference comes from its unique ability to blast into the crevices of any surface. Its adjustable pressure allows removal with virtually no damage to the surface. Its vacuum recovery system recovers nearly 99% of the debris leaving the area clean and nearly dry. No chemicals and no mess.

## AIRPORT SERVICES

Highway Markings can provide FAA compliant airfield markings and marking removal. Runways, taxiways, and ramps can be changed as your needs change. Growing, expanding, or updating your airfield has never been easier. We can provide full service maintenance for your airfield marking needs. From marking removal to rubber removal we have you covered. Our painting service can put your airfield markings back where you need them shortly after we removed them. Our professional staff has the experience and know how to get the job done right.

## CONSTRUCTION SERVICES

Waterblasting can eliminate the need for temporary tape. Don't waste your money on maintaining temporary tape throughout your construction project. Use the waterblasting solution! We can temporarily paint your project and remove it when you are ready to switch traffic. We can save you money and help your bottom line.

We can also provide curing compound removal. Avoid the dangers of grinding concrete and waterblast where your lines will go. Extremely fast and economical; we make it cost effective. Save your labor and equipment wear and tear. We can remove curing compound at more than 5,000 linear feet per hour.

The waterblasting method is approved by every Transportation Department we work for. Whether you're a paint contractor or general contractor we can provide the service to make your job safer, cleaner, and easier.
